Hubstaff + ClickUp Operations Dashboard

Where every number comes from, and every data problem we found.

1. Data Sources (kahaan se aata hai)

Dashboard 2 systems ko Supabase (Postgres) me jodta hai:

Hubstaff	Time / ghante	hubstaff_activities, _projects, _clients, _tasks, _members
ClickUp	Structure (Dept/Team/Client/tasks)	clickup_tasks

Total tracked: ~350,853 hours | Employees: 230 | Clients: 333 | Teams: 19 | Departments: ~13

2. Har cheez kaise banti hai (lineage)

Department	ClickUp space_name	'-' se pehle. e.g. Operations - Titans -> Operations
Team	ClickUp space_name	poora space naam
Client	ClickUp folder_name	folder = client
Client type	folder naam	(F)=Fixed, (H)=Hourly, warna Project
Employee	Hubstaff user_name	ClickUp assignees se naam/email match
Hours	Hubstaff tracked	seconds / 3600
Billable/NB	task/project naam	'NB' marker = non-billable

Hubstaff ↔ ClickUp link: hubstaff_tasks.remote_id = clickup_tasks.task_id (integration 189908). Match hone par task naam 99.97% same. ClickUp me Hubstaff ID nahi — link ek-tarfa.

Formulas: Utilization = tracked / (days x 8h), capped 100%. Activity = overall/tracked. Productivity = billable share. Grade = 0.4 Util + 0.3 Prod + 0.3 Task-completion.

3. Matching Coverage

Task + matched to ClickUp	53.4%	61.6%
Project-level (no task)	20.8%	30.7%
Task but unmatched	25.8%	7.8%

Jab task pe ClickUp ID hota hai, woh ~89% match karta hai (2026). Overall isliye kam, kyunki ~30% time bina task ke seedha project pe track hota hai.

4. Problems (data-verified)

A1	ClickUp tasks ka Space label BLANK (e.g. Operations - Bravix) -> Dept/Team map nahi hota	~23,321 h
A2	Naam variants: Ledger Labs-, Ledger Labs Inc., 'marketing' (lowercase) - standard nahi	naming
A3	ClickUp se DELETE ho chuke tasks (zyadatar 2023-24 purana)	~51,000 h
B4	Hubstaff projects me Client linked nahi (sab '(no client)')	all projects
B5	Hubstaff member names blank (asli naam activities.user_name me)	data hygiene
B6	Galat 8-char task IDs - 0 match	520 tasks
B7	Bina task ke seedha project pe tracking (Training/Emailing/Admin/NB)	21% time

C8	DOUBLE-COUNTING: har employee ke saare ghante ek 'primary' team me -> team totals 3.4x, dept totals 2.3x inflated	BIG
C9	Utilization 'active days' use karta hai; company rule (Mon-Fri + 1st Sat) = 'working days' hona chahiye	metric
D10	Archived Projects = purane projects ka store-room (168 me 165 band); 'Emailing & Training' (17,931 h) internal kaam galti se yahan	65,724 h

5. Fix / Action Plan

1	Attribution task-ID link se rebuild + working-days utilization	Dashboard	Turant sahi
2	ClickUp blank Space bharo (Bravix se), naam standardize, delete mat karo	ClickUp admin	53% -> ~76%
3	Hubstaff projects-client link, member names, 8-char ID	Hubstaff admin	Clean data
4	Recurring kaam ke liye standing ClickUp tasks	Team leads	31% ghatega

Target: abhi 53% exact match -> Phase 1+2 ke baad ~90%, asli client hours, working-day utilization.

6. Proof (verified)

- Match link: 45,113 Hubstaff tasks me 35,428 ClickUp se match, 99.97% same naam.
- Double-counting: sab team totals ka jod = 1,204,967 h (OLD) vs actual 350,853 h = 3.4x inflated.
- Sohan Singh: OLD har team me poora 6,874 h; NEW asli split (Titans 4,275 + Archived 1,344 + Alliance 680...) = 6,874 h, no double-count.
- Utilization: Sohan March active-days 100% vs working-days 94%.
