

# Time Tracking Coverage vs ClickUp

How tracked time links to ClickUp tasks | All-time + current year

Of **350,853 total tracked hours**, **53%** is on tasks linked to ClickUp, **21%** is tracked directly on a project (no task), and **26%** is on tasks that don't match any ClickUp task.

|                           |                              |                    |
|---------------------------|------------------------------|--------------------|
| TASK + MATCHED TO CLICKUP | TRACKED ON PROJECT (NO TASK) | TASK BUT UNMATCHED |
| 53.4%                     | 20.8%                        | 25.8%              |
| 187,202 h                 | 73,107 h                     | 90,545 h           |

■ Task matched to ClickUp ■ Project-level (no task) ■ Task unmatched

## Breakdown

| Category                     | Hours   | Share | Meaning                                               |
|------------------------------|---------|-------|-------------------------------------------------------|
| Task — matched to ClickUp    | 187,202 | 53.4% | Task ID found in ClickUp (exact link)                 |
| Tracked on project (no task) | 73,107  | 20.8% | No task created — time logged on the project          |
| Task — unmatched to ClickUp  | 90,545  | 25.8% | Task exists in Hubstaff but not found in ClickUp data |
| Total                        | 350,853 | 100%  |                                                       |

## Current Year (2026) — for context

In 2026 so far: **62%** matched, **31%** project-level, **8%** unmatched. Of the time that DID have a task, **89%** matched ClickUp — current tracking links far better than older years.

Definitions: Hours = Hubstaff tracked time. 'Matched' = the activity's task carries a ClickUp task ID (hubstaff\_tasks.remote\_id) that exists in ClickUp. 'Project-level' = the activity has no task at all. 'Unmatched' = a Hubstaff task exists but its ClickUp ID isn't in the ClickUp data (deleted / not synced) or it never had one.
